## WHY NOW?

The global human challenge is between light and darkness.

**What is the purpose of life? What does victory look like? Is there a supernatural being on this planet? Where is our hero?**

**The Bearth TV Series is based in actual truth. The story is real. All the events are real. The cataclysms have either already happened, or are possible. It will reach the SciFy and the Esoteric audience like nothing ever filmed. 20 million people are waiting for the book to become film.**

# Target Market

## Target Setting

The goal of the Bearth is to reveal the symbiosis between man and the planet Earth. It is futuristic but still deeply connected to an audience wondering about the true purpose of life.

## Target Cinematography

Bearth will utilize special effects, CGI and other techniques to create amazing worlds and creatures that would be impossible to create in real life. It is written and is destined for the big screen.

## Target Message

Bearth is not like any rapture story ever filmed. The battle between good and evil is plausible and yet supernatural. This story is innate in every human being, and yet has never been told.

## Target Audience

- People who love high tech
- People who love imaginary yet plausible worlds
- People who enjoy futuristic stories
- People who like action/adventure stores
- People looking for a reason for reality

## The Modern Movie

Film has changed. What's more, the audience has changed. They have met fear and power like they never imagined. They no longer go to the theater to see their favorite actors. They go to take a journey

Film is not good enough without the music, the cinematography, the speed and power of action pulling a deep spiritual message through their souls. Unknown actors have an equal footing with traditional box-office talent, because the modern audience feels betrayed by Hollywood.

People want to leave the theater feeling changed, enlightened, and inspired.

# LOGLINE

Planet Earth is alive. It cannot decide to destroy mankind again or release its bounty to it. Or both.

## STORYLINE

# **Bearth** is a true story of Earth.

In ancient times, when the more part of humans chose wickedness, the earth would have an allergic reaction. A volcano, earthquake, or an ice age would rise up and put the race back down to a few tribes to begin again.

This time humans grew too fast for the planet to keep up. Now, there are 8 billion humans alive and conscious at one time on Earth. Will she destroy them? Will she release more of her bounty to them?

As long-prophecied, she will give birth to a new Earth. The higher vibrational planet will head home, across the Milky Way, and take the higher vibrational children with her.

The dark angel Semyaza has captured the souls of more than half the humans on Earth. They will remain on the rock and metal planet in orbit around our Sun. He intends to send the new Earth home alone.

# SYNOPSIS

For over a century, America has groomed and placed presidents to further the dark angel's plan. One party. One script. Rule by law and weapons.

Robert Riker lost his wife to cancer and vowed to try to save the country from destruction. Running his own campaign by answering all the questions on his YouTube channel, he had built up an enormous following; one the Globalists knew nothing about.

During the final debate, the two groomed candidates get into a fist fight on global TV. Thousands of viral cell phone feeds later, Riker was written in as the new president.

Secret Service Agent Ezzat Hadid, a member of an ancient sect, unlocks the secret for Riker. The cataclysms begin.

# Plotline Volume One

## The Planet

Planet Earth actually meets the criteria of a living being with its own consciousness. She has a symbiotic relationship with the sentient beings living upon her.

When humans are mostly good, the planet releases her bounty. When humans are evil, the planet has an allergic reaction and destroys the race back down to a few tribes.

Now, there are 8 billion souls alive at once. Half are good. Half are evil. Rather than wiping them out, she divides in two; one higher vibration and one lower.

## The Human Race

Prophecies have a way of showing up at exactly the right time; never late. In times like these, simple and unlikely heroes come forth to save the world.

Robert Riker is elected as a write-in candidate for president. The first major cataclysm strikes the Gulf of Mexico, and he is informed the rapture is beginning and that he must serve as the leader of higher Adam.

A series of battles and daring escapes, the heroes are forged for a major battle at Camp David. The audience is left wanting Volume Two to show tomorrow.

# Plotline Volume Two

## The Planet

Earthquakes, lightning jumping across space and massive military movements sweep the planet.

Ancient Nephilim (fallen angels) work an evil plan from deep within the mountains to capture the souls of all mankind. Rules written from the foundation of the universe must be followed in order to win. Mecca, Vegas, and other major cities disappear in a blaze of hot plasma. The vibrations of Earth are dividing into two Schuman Resonances.

## The Human Race

Boris gets in a fight outside the Tinkoff restaurant in Kazakhstan to defend his wife, scarring his attacker. They retaliate by blowing up his home with his beautiful wife inside. The ensuing nuclear plot carries the viewer through the hate that condemns and the love that saves the human soul.

Riker's unlikely team of heroes come together to help him save the world from darkness, but at what cost?

# Plotline Volume Three

## The Planet

The two planets have come apart. The higher Earth begins drifting slowly out of orbit toward its ancient home through the dark rift in the Milky Way. It leaves the Sun and the Moon behind.

The old Earth made of metal and rock is still in orbit around the Sun next to its cold, lifeless Moon.

The Nephilim makes one final attempt to wipe out all life on the higher Earth by enlisting the assistance of enormous alien mother ships filled with fighter-bombers.

## The Human Race

Riker's team of heroes invent and deploy defensive weapons that don't harm their own soul. They also invent a new sustainable form of energy that will keep the higher Earth light and warm during its million-year journey to its paradisiacal home.

The veil between the dead and the living thins, and the window opens between worlds. The purpose of mortal life falls onto the viewer without the church and without the guilt.

The final battles nearly destroys the world, but the human race continues to survive the worst the Nephilim can deliver. New Eden forms in the light of the higher Earth on its way home, through the rift in Milky way.

# TO NE

Beath needs great CGI to get the planetary upheavals and destructive lighting to create the atmosphere. The battle scenes range from the conventional to the spectacular, similar to those in *Agents of Shield*.

Site R and Cheyenne Mountain are vast underground military facilities that align with the secret deep state that is connected to nearly every major headline in the world today.

The deep spiritual tones deliver powerful messages of the eternal age and power of the human soul contrasted with the ageless evil of fallen angels.
